Experience

Cybersecurity Intern | Bruce Power

May – August 2026

Tiverton, Canada

- Enabled **live plant modification testing** by building a **distributed virtual environment** to simulate nuclear systems
- Processed **2000+** daily security and system events in real time to identify operational irregularities through a log collection and monitoring pipeline built with **DataBahn** and **Splunk**
- Increased **threat visibility** and detection by developing Splunk dashboards and **automated alerts** to visualize and index authentication, security, and nuclear event data
- Prevented **unauthorized** access by isolating protected virtual systems by **one-way** data flow through a data diode

Data Engineer Intern | Bruce Power

May – August 2025

Tiverton, Canada

- Sped up document processing by **80%** by building an **automated export pipeline** using PowerAutomate and HTML to generate PDF and OneNote summaries of events impacting nuclear regulations
- Reduced manual file lookup time by **50%** by implementing a **full-text file search automation** across **200+** Word and PDF documents by calling **SharePoint REST API** to filter metadata
- Developed **PowerBI** dashboards to monitor the status of **300+** regulatory actions, ensuring deadlines are complete
- Centralized Regulatory Affairs data by **migrating legacy databases** into **PowerApp** to support future scalability

Frontend Developer | Pagent.tv

December 2024 – March 2025

Waterloo, Canada

- Improved screen load times by **30%** by reducing unnecessary component re-renders across screens
- Developed **responsive** TypeScript UI components and implemented navigation functionality using React Router and Icon libraries, ensuring **UX parity** across iOS and Android
- Created dynamic **search** functionality to surface the most relevant accounts through user search queries
- Enabled real-time **syncing** of user data by connecting a **TypeScript** frontend to backend **REST API** endpoints

Projects

Daily Dose of Tech | twitter.com/DailyDoseOfTech

Python, Tweepy, PRAW, AWS Lambda

- Developed a Twitter bot that automatically tweets out trending news content selectively scraped from Reddit pages
- Attained **50,000+ organic impressions** through automated tweets

AniCollection | anicollection.org

ReactJS, Jikan API, Google Cloud Platform

- Built a full-stack web app to allow users to create and share collaborative anime collections with others in real time

Eventify | eventify.one

ReactJS, Spotify Web API, TicketMaster Discovery API

- Created a web app to enable users to easily view and add upcoming concerts of their top artists to their calendars

Education

Wilfrid Laurier University

Expected August 2029

Bachelor of Science in Computer Science, Co-op

Bachelor of Business Administration, Co-op

Skills

Languages C/C++, Java, TypeScript, JavaScript, Python, SQL, VBA, HTML/CSS

Tools & Libraries AWS (Lambda, S3, EC2, VPC), Google Cloud Platform, Splunk, Git, MongoDB, Power Platform, ReactJS
