Experience

Cybersecurity Intern | Bruce Power

May – August 2026

Tiverton, Canada

- Incoming Summer 2026

Data Analyst Intern | Bruce Power

May – August 2025

Tiverton, Canada

- Centralized Regulatory Affairs data by migrating legacy databases into **PowerApp** to support future scalability
- Sped up document processing by **80%** by building an automation export pipeline with **PowerAutomate** and **HTML** that generates PDF and OneNote summaries of events impacting nuclear regulations
- Reduced manual file lookup time by **50%** by implementing a **full-text file search automation** across **200+** Word and PDF documents by calling SharePoint REST API to filter metadata
- Developed **PowerBI** dashboards to monitor the status of **300+** regulatory actions, ensuring deadlines are complete

Software Engineer | Laurier Computing Society

January – April 2025

Waterloo, Canada

- Built an **interview scheduling** platform for **250+** Laurier clubs with department-based candidate matching
- Enabled real-time **syncing** of interview data by connecting a React frontend to **MongoDB** backend endpoints
- Allowed users to manage interviews through an interactive web interface by developing React components
- Created a **responsive** and accessible user experience across desktop and mobile using **CSS**

App Developer | Pagent.tv

December 2024 – March 2025

Waterloo, Canada

- Developed responsive frontend UI components with **TypeScript**, ensuring consistency across iOS and Android
- Improved screen load times by **30%** by reducing unnecessary component re-renders across screens
- Created dynamic **search** functionality to surface the most relevant accounts through user search queries
- Implemented a navigation bar with search functionality using React Router and React Icon libraries

Projects

Daily Dose of Tech | twitter.com/DailyDoseOfTech

Python, Tweepy, PRAW, AWS Lambda

- Developed a Twitter bot that automatically tweets out trending news content selectively scraped from Reddit pages
- Attained **30,000+ organic impressions** through automated tweets

AniCollection | anicollection.org

ReactJS, Jikan API, Firebase, Firestore

- Built a full-stack web app to allow users to create and share collaborative anime collections with others in real time

Eventify | eventify.one

ReactJS, Spotify Web API, TicketMaster Discovery API

- Created a web app to enable users to easily view and add upcoming concerts of their top artists to their calendars

Education

Wilfrid Laurier University

Waterloo, ON

Bachelor of Science in Computer Science, Co-op

Sept 2024 – Present

Bachelor of Business Administration, Co-op

Sept 2024 – Present
